Aim. In this paper, I call into question the widely-held assumption of a single, more or less unified paradigm of "qualitative research" whose methodologies share certain epistemological and ontological characteristics, and explore the implications of this position for judgements about the quality of research studies.

## Validity, trustworthiness and rigour: quality and the idea ...

Idiopathic thrombocytopenic purpura (ITP) is an autoimmune disorder characterized by persistent thrombocytopenia (peripheral blood platelet count  $< 150 \times 10^9/l$ ) due to autoantibody binding to platelet antigen(s) causing their premature destruction by the reticuloendothelial system, and in particular the spleen (Woods et al, 1984a,b).. Although the basic underlying pathophysiology of ITP has ...

A route of administration in pharmacology and toxicology is the path by which a drug, fluid, poison, or other substance is taken into the body. Routes of administration are generally classified by the location at which the substance is applied. Common examples include oral and intravenous administration. Routes can also be classified based on where the target of action is.

*Aeromonas salmonicida* is a pathogenic bacterium that severely impacts salmonid populations and other species. It was first discovered in a Bavarian brown trout hatchery by Emmerich and Weibel in 1894. *Aeromonas salmonicida*'s ability to infect a variety of hosts, multiply, and adapt, make it a prime virulent bacterium. *A. salmonicida* is an etiological agent for furunculosis, a disease that causes ...

Background: Patients with communication disability, associated with impairments of speech, language, or voice, have a three-fold increased risk of adverse events in hospital. However, little research yet examines the causal relationship between communication disability and risk for specific adverse events in hospital.

Staphylococcus aureus is a Gram-positive, round-shaped bacterium that is a member of the Firmicutes, and it is a usual member of the microbiota of the body, frequently found in the upper respiratory tract and on the skin. It is often positive for catalase and nitrate reduction and is a facultative anaerobe that can grow without the need for oxygen. Although S. aureus usually acts as a commensal ...

Neonicotinoid insecticides are widespread in surface waters across the agriculturally intensive Midwestern United States. We report for the first time the presence of three neonicotinoids in finished drinking water and demonstrate their general persistence during conventional water treatment. Periodic tap water grab samples were collected at the University of Iowa over 7 weeks in 2016 (May ...
